

Engineering Checklist

Name: _____

Phone # _____

Site Address: _____

Mailing Address: _____

Please check with your City/County in regards to permitting your building/ carport. We recommend that you call your planning department directly to avoid inaccurate information online. We will need the following:

1. Snow Rating:

a. Ground snow load psf: _____

b. Roof Snow load psf: _____

2. Wind Rating _____ MPH

a. Your ground surface _____ (**If you are creating a new concrete pad for your structure, we will include concrete engineering with pad specifications with your drawing purchase. Please ask us about this**)

3. Please check if you need Calculations along with Engineered Drawings:

a. Yes _____

b. No _____

Setbacks, Easements and Installation site: We don't have knowledge on set backs or easements, or special requirements based on the installation location (i.e. firewalls, animal preservation, etc). We will not be responsible if your permit is not approved based on this, please verify through your planning department before ordering your building and/or drawings. Please note that the engineer may add material to your structure once the drawings are complete. If this is the case you will be responsible for the added material costs.
